High Energy physics project

José David Ochoa Flores[1]

[1]Maestría de Física, Universidad San Francisco de Quito, Quito, Ecuador.

Resumen

The following project aims to simulate a BSM model using the *FeynRules*

1. Seccion 1

Next we detail the full simulation chain of a Drell-Yan process.

Figura 1: $J/\psi\, mass\, fit$

(a) Trigger efficiency Monte Carlo   (b) Trigger efficiency Data

Figura 2: Plots for trigger efficiency

2. Conclusion
